2018 IMPACT SHEET

Lebanon's First Impact Sourcing Platform that provides high quality digital services executed by Skilled Youth from marginalized communities in Lebanon.

B.O.T ensures women and youth have access to global and local digital work placing them in the base of the working pyramid where they can work their way up while securing a source of income.

In 2018, B.O.T has impacted youth and their communities 90% of which working remotely across the country, providing them with digital jobs and ensuring a promising future.

YOUTH IMPACT

Mira first joined B.O.T in October 2018 after graduating from a bachelor in Sociology and completing the Digital Media Literacy and the Mobile Application Development courses with DOT Lebanon under the GIL program by UNICEF. Despite her intelligence and academic achievement, Mira struggled to find a job that is related to her field of studies.

She faced a few hurdles throughout her first project; lacking self confidence and communication skills. Yet project after another, the 22 year old 'botter' has come to realize that she has developed many skills on both the personal and professional scale. Today, Mira has worked on four different projects with B.O.T that are not in any way alike. A proof that botters are quick learners and witty youth, eager for new digital skills to achieve all sorts of projects.

I started to get frustrated that I won't be able to find a job in Lebanon, but I've been generating income ever since I joined B.O.T and I'm thankful this is my first working experience.
